A Brand New Program

Galileo Digital Pianos and your local music retailer are bringing together an affordable opportunity for both academies and charter schools to have an exciting new music curriculum. It's called the *My First Piano* program.

It's a brand new program that can offer your students a rewarding and memorable avenue to introductory elementary piano, plus to experience the joy of music appreciation through an entertaining journey through music history and the instruments that make up our music, from yesterday to today.

A One Time Investment in Music

The *My First Piano* program can offer your school, a one time investment, in an effective music curriculum, that can offer your students, year after year, the opportunity to experience, in your school, the joy of music!

An affordable avenue to a music curriculum

Today, not all school systems have the opportunity, funds or facilities to offer a music curriculum. It takes a major investment in both instruments and teachers, plus an effective program to properly create a successful music program. In most academies and charter

schools, often a music program is not available.

Now, an affordable, very qualified, endorsed and complete elementary introductory piano program is available for your school system from Galileo Piano Labs and educational programs.

A Galileo Piano Lab for your school system will offer a one time investment for the opportunity to give your students the joy, memory and an open door to music!

The Galileo Piano Lab

The Galileo Piano Lab is designed to introduce elementary students to introductory piano by utilizing an in school piano lab of a selected number of My First Pianos.

It's here that students will take with them, the experience of music and music appreciation.

With the support of both an experienced and trained teacher plus the use of both visual DVD and computer interactive programs, your school system can offer an elementary music program that will be remembered for a life time.

The My First Piano Program

The My First Piano program is the perfect program for elementary school students. The program consists of a selected number of My First Pianos to form a piano lab, complete with benches, internal sound systems and headphones for silent playing. In addition, My First Piano, has a closing lid that when closed, offers this instruments to be utilized as a versatile student desk.

A My First Piano Lab can be purchased by your school system and in support with your local music retail education center, a successful music program that includes both piano and music appreciation, can become an important part of your schools curriculums.

Your my First Piano Lab will include full delivery and set up along with not only an effective teaching program that combines both video and hands on teaching, but for the first eight to ten weeks, depending on your schools semester, a qualified instructor will be supplied at no cost. After that period, your school can contract the teacher at your expense or we will train an in house teacher to coordinate the piano program.

In addition, your piano lab will also include a flat screen TV with a built in DVD player for use with the included teaching program. Each student would be required to purchase a book and DVD to participate.

Students will have the additional opportunity to continue more advanced lessons at the sponsoring local music retailer or a program could be created for after school, utilizing your new piano lab. Your new piano lab could be available also for student practice.

My First Piano can be a very worthwhile investment for your school.

The My First Piano

The My First Piano represents an exclusive instrument, designed with piano introduction as a primary goal. With its PCM piano sample and real piano like action, it duplicates both the sound and feel of a real piano. Its unique slow closing lid, offers this instrument to be also utilized as a desk for use in both classroom and home use.

In addition, with its USB plug, My First Piano is capable of interfacing with digital educational programming, MIDI applications, plus interface with tablets, iPads and more, to make this instrument an instrument to take students into a new avenue of music education.

Other features such as the additional 128 sounds can create a pallet of instrumental directions, combined with 100 easy play arrangement patterns, can offer a student and family, musical fun and instant musical ability. In addition, there are 100 built in songs that allow students to play along with or record their own song internally.

Combine all these features with a sturdy bench with storage, four beautiful colors, plus audio inputs and outputs along with stereo headphones located on a convenient hanger, plus the keyboard stickers and an understandable manual make ***My First Piano, the perfect choice for an inspiring student and your schools piano lab and music curriculum.***
